

TV SHOWS SUPPORT SOFTWARE

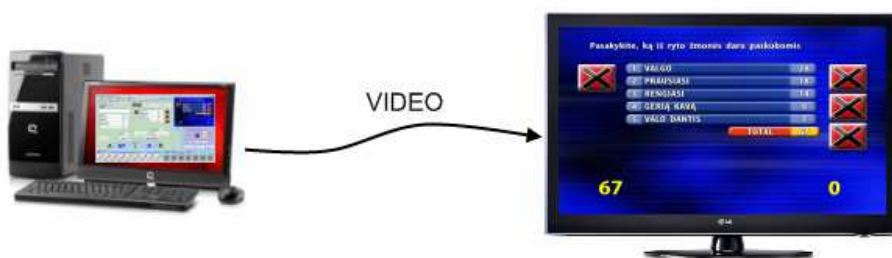

TV show "Šeimų dvikova" is supported by the software which provides control of all needed information: questions database, points, scores, playing video clips at a round start time, playing audio depending on player answers and etc. Video and audio clips can be played together with audio. Software offers easy controlling of video and audio clips by simply pressing assigned buttons. Timer for maximum answer time is included as well as undo function. Preview window of video out is also available on the computer screen.

Graphic view must be prepared as templates with TEXTUS EDITOR software. You can use any TRUE

TYPE font of any size, color and different attributes. List of the questions is stored in a database. Video out can be directly connected to the studio projectors or TV monitors.
